MISCELLANEOUS.

Highly Important to Farmers and Planters. A NEW End IN AGRICULTI RAL PROSPECTS.

A NEW EAR IN AGRICULTI RAL PROSPECTS.

COMBINATION OF

KETTLEWELL'S SALTS WITH PERUVIAN

GUANO MADE A LASTING MANURE.

It will be remembered by all who have read the adventisements of the undersigned, in the American Farmer and elsewhere, that he frankly admitted the superiority of Pentyuan Guano in the rapid production of a Wheat crop, although he as firely contended, that his Salts were far more lasting, much better adapted to the growth of Claver, with a deciled advantage to the land, for a rotation of crope. To this opinion he still adheres, and it has been confirmed by the most extensive experience.

The opinion which the undersigned entertained, that a mixture of his Chemical Salts and Peruvian Gueno, would make one of the most prompt, cheap, and what is of more importance, lasting manures, known to the top, was most favorably entertained by the best practical and sciencinic chemists in the country, and has now been demonstrated by unquestionably, one of the most accomplished and asite chemists we taye. All who know Dr. David Sowarr, will admit that as an agricultural and scientific chemist, he is second to no mon in the nation.

For the conclusive and intelligent reasons upon which these opinions are based, the undersigned confidently refers to the communication here with published. Now the undersigned can testify tenn his

man in the nation.

For the conclusive and intelligent reasons upon which these opinions are based, the undersigned confidently refers to the communication herewith published. Now the undersigned can testify from his own experience, not only to the liberality and emerprise with which the agricultural community seek the best remedy to renovate their lands, and increase their crops, but when disappointed in their full anticipations, the generosity and forbearance which they manifest to the manufacturer, when they believe his efforts are honest and fair. The andersigned asks no may—wante no more than such a trial—His own faith in its entire and unqualified success, is as strong and stern as was that of the ancient prophet. He stands not alone in this opinion; it is firmly sustained by those who are dismiterested, and whose opinions are not only entitled to respect from every quarter, but should disarm the most skeptical from any suspicion of quackery or humbug. The farmer cannot lose by buying this mixture. It contains every element the soil requires. There is nothing absent—nothing deficient. Instead of exhausting the soil, it gives it permanent improvement. The undersigned, therefore, trusts and earnestly requests that the farmer who buys five lons of Guano, should try, side by side, fairly and without prejudice, one or more tons of this compound.

Campound.
What will it cost?
Half ton best Peruvian Guano, will cost, say
Half ton Chemical Salis, will cost

832 50 Therefore, is the cost per ton, not as much as Patagonia, nor much more than Mexican Guano, and \$13 less than Peruvian whilst the undersigned sacredly avers his firm belief, that for cop and land, wheat and clover, it is really worth \$10 per ton more thin even the

more than Mexican Guano, and spicess than Petevian white the undersigned secredly avers his firm belief, that for crop and land, whetat and clover, it is really worth \$10 per ton more than even the best Peruvian Guano.

Three hundred loss of the best Peruvian Guano would cost say, \$6.50 per acre 300 lbs. of the Salts and Guano, would cost \$30, \$6.50 per acre 300 lbs. of the Salts and Guano, would cost \$40, \$6.50 per acre 300 lbs. of the Salts and Guano, would cost \$40, \$6.50 per acre 300 lbs. of a ton of the best Peruvian Guano, would cost say, \$15.33 feets, two thirds of a ton of the best Peruvian Guano, would cost say, \$15.33 feets, two thirds of a ton of the Salts would cost say, \$13.32 feets, or \$25.67 ets, per ton. Now the undersigned does not bet, and it is no argument, but he will agree to present One Hundred Dolars each, to the Saue Agricultural Societies of Maryland and Virginia, if any advocate of Patagonian. Mexican or African Guano, will do the same, upon the condition that this compound will yield a better crop, and afford more improvement to the land than either of the Guano specified. The understand in cans the last preparation, costing \$25.67 cts, per ton; and the party losing, to pay the forfest. Quantity, soil and cultivation to be the same, under or by the direction of the Presidents of either of the above Societies.

If the undersigned mixes this compound, there will be a charge of \$20 per ton, which is the actual cost. In all cases the very best Peruvian Guano will be used, and a forfeiture of One. Thousand Dolars paid, where the quantity of Guano directed, is found deficient by sompetent analyzation. A certificate under oath, will also be furnished, whethever required, to each order. When the Farmer makes paid, where the quantity of Guano directed, is found deficient by sompetent analyzation. A certificate under oath, will also be furnished, whethever required, to each order. When the Farmer makes paid, where the quantity are cannot be undersigned to supplied by being ploughed done, as whe

with orders, and the exact proportions of Guano and Salis, as may be directed.

The undersigned has been for four years i horiously engaged in the manufacture of chemical manures, and he has been generously supported by the farming interest, not having one barrel of his compounds left the past season, and for which he thus publicly returns them his respects and gratitude. And while he knows that the same energy—the same amount of capital and enterprise, would have yielded him more profit in almost any of the active business pursuits of life, yet at the start it was his fancy; and time has made it a "labor of love." In conclusion, he refers to any respectable citizen of Baltimore who knows him, for how far he is deserving of confidence, as d having but recently been the high Sheriff of the city, he is tolerably well known.

To his old friends and customers who have always preferred his pure Biphosphates and Renovator to any other manure, he carnestiy

To his old friends and customers who have a lways preferred mis-pure Biphosphates and Renovator to any other manure, he earnessty solicits a continuance of their favors. He will have an ample stock on hand, and all orders will be promptly filled. Also, constantly on-hand, the very best "GROUND PLASTER." an article, in the pur-chase of which, farmers cannot be too careful. Also, "GROUND PLASTER AND POTASH," "ACRICULTURAL POTASH," &c., 1014 STETLEWELL. &c. JOHN KETTLEWELL, OOffice at the wholesale Drug Store of Ober & Co., corner Lombard and Hanover streets. LAND FOR SALE.

ENTENDING to remaye my seri ants to the South in October next, a lines offer for sale the tractof land on which I resule, lying most by in the county of Madison, on the Bapid Ann river, about midway between Oratice Court House and Burboursville, and immediately on the Manudamized read leading from Gordonsville, and immediately on the Manudamized read leading from Gordonsville, on the Central Rail Roma, to the Valley of Virginia, containing by recent survey, seven involved and seventy six acres.

If the land is not rold privately by the 16th of August, of which disc notice will be given. I will, ben, on that day, if fair, it not, the next fair day, on the premises, offer if at public auction, either in whole or a divided tractiste suit purchasers. A plat of the whole faire, and also of the divided tracts, will be exhibited to those viewing the premises.

There are about 525 acres cleared, divided into six fields and one is —the bottome in heavy timber. There are about 50 acres of fertile river bottom, with an additional quantity of Creek Flats for meadows.

The read is wall protocod, and the scale real adaption the grown.

the river bottom, with an additional quantity of Creek Flats for meadows.

The tract is well watered, and the soil well adapted to the growth of Wheat, Corn, Outs and Tobacco, also to grasses of all kinds—Being near to market, the grazing system might be advantageously blended with tancing operations. Its proximity to an extensive flouring mitland Central Ball Road to Richmond, also to the Alexindria Rail Road and be Plank Road to Federick Sourz, by means of which several improvements, either of the three markets can be cheaply and readily resorted to, must necessarily add to its value, and make it a desirable location.

The health of the neighborhood and general intelligence of the citizens in this recion of country, are proveibial. Those withing a more particular description, are referred to the Hon, Jeremiah Morton, Guipeper county, Va., R. B. S. merville, Richmond, and to the subscriber on the premises, whose address is Liberty Mills, Orange county, Va.

CAMBERT'S OFFICE.

Schames for the Week.

In introducing this wheel, it is but just to state that although the proprieters of the patent have been frequently solic ted to dispose of the right for the States hordering upon those which they intend to retain, they have steadily refused to do so until by a series of elaborate and costly experiments, they have demonstrated the truth of the extraordinary advantages claimed (o. it. Their enterprize in this respect has arready been handsomely rewarded by extensive sides in the States of Alabama and Georgia.

The distinguishing characteristic of the "Rich Pressure Centre-Vent Water Wheel," is that it may be used with equal advantag-with the shaft, either in a vertical or horizontal position. The great secret of its wonderful power, is the simple and direct aprilication or pressure of the water upon the persphery of the wheel and its escape inwards in such a manner as to aid by its continued action, the notion of the wheel.

5. It is a wheel which from its simplicity and compactness can-
